Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

All remaining rejections/objections follow.

All withdrawn rejections were withdrawn based on applicants amendment and response.

Claims 1-25 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Knoll et al (US 6,031,053).

Patentees disclose a process for producing block copolymers in which successive charges of butadiene/styrene mixture are polymerized with randomizer present to produce block copolymers having applicants styrene content, a process similar to that of applicants specification and therefore presumably producing products similar to applicants. Note Table 1 in this re. Note that coupling agents are added in some of the examples at the paragraph bridging columns 6 and 7, a process known in the art to be inefficient and result in mixtures of coupled and substantial amounts of uncoupled block copolymers thus embracing applicants claims apparently requiring at least two block copolymers.

When the reference discloses all the limitations of a claim except a property or function, and the Examiner cannot determine whether or not the reference inherently possesses properties which anticipate or render obvious the claimed invention, basis exists for shifting the burden of proof to applicant. Note In re Fitzgerald et al. 619 F. 2d 67, 70, 205 USPQ 594, 596, (CCPA 1980). See MPEP § 2112-2112.02.

Applicant's arguments filed 4-6-06 have been fully considered but they are not persuasive. Applicants position that 100% of the vinyl aromatic blocks have a molecular weight of 35,000 or less are based on their position that "Styrene 2 to Styrene 4 each form a random structure with butadiene". However, the instant claims do not exclude comonomer from their vinyl aromatic blocks and in fact implicitly require it given that the "block rate is not 100%. Nothing in the term "block" as the term is used in the art excludes sequences with a random arrangement or monomer.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Jeffrey C. Mullis at telephone number 571 272 1075.
